DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 2, drawn to a system for monitoring operation of a cerebrospinal shunting system.

Group II, claim(s) 3-9, drawn to a method of determining cerebrospinal fluid flow resistance.

Group III, claim(s) 10-16, drawn to a method of monitoring cerebrospinal fluid flow resistance.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I claims the special technical feature of an inclination sensor that is not present in group II. Group I also claims a wireless transceiver that is not claimed in group III.

Group II claims steps for calculating distal flow resistance that are not claimed in groups I or III.

Group III claims steps for changing a drainage mode and calculating elapsed time from said change that were not claimed in groups I and II.
